

Essential Skills Pathway

Using the magnifying glass and the document icons to suggest that this training pathway focuses on enhancing BA capabilities.

The Essential Skills Pathway is for new BAs who wish to fast track from being a project BA resource to being a BA contributing to planning and managing the BA effort on projects. This 18-24 month pathway enhances the capability of BAs by broadening their perspective from a narrow, technique-based focus to a broader project-wide view.

Courses

1. Requirements Elicitation & Review
2. Requirements Analysis Techniques
3. Scope Your Area of Analysis
4. Requirements Management

Process Pathway

The globe shape and the ripple like waves suggest the pathways focus on exploring technology based solutions within a business.

The Process Pathway is for seasoned BAs who recognise the value of defining the business context in which solutions operate. Today's reality is that business solutions are all about the smart use of technology. This 6 month pathway equips the BA to reach into their toolkit of analysis skills to design technology-enabled business processes that enhance business capability .

Courses

1. Requirements Analysis Techniques
2. Practical Process Modelling with BPMN

Business Case Pathway

The use of the arrows in the evolving motion is to suggest return on investment for the BA within this training pathway.

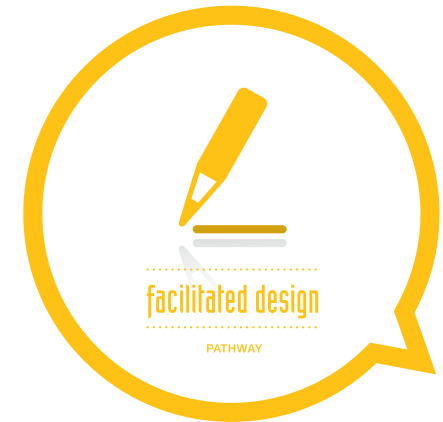

The Business Case Pathway is for intermediate BAs who wish to learn how to maximise the return on investment of their BA work. This 18 month pathway enhances the role of the BA as keeper of business value.

Courses

1. Scope Your Area of Analysis
2. Develop a Business Analysis Workplan
3. Develop an Effective Business Case

Facilitated Design Pathway

The pencil is to symbolise design, the idea of putting pencil to paper to be creative and think outside the box.

Design thinking is a mindset. With this in mind, the Facilitated Design Pathway develops intermediate BAs' facilitation capabilities to encompass human centered and empathetic elements. These elements are key to creativity and better customer experience design. This pathway takes 18 months to complete.

Courses

1. Requirements Analysis Techniques
2. Facilitating Requirements for Business Analysis
3. Beyond Brainstorming
4. Design Thinking
